

Precision and quality with a superior finish

A new standard for softwood plywood designed for industrial users. Tolko T-PLY Precision Sand plywood provides a smooth, solid face on a panel that is a consistent thickness from panel to panel, lift to lift and order to order.

Applications

Tolko T-PLY Precision Sand is particularly well suited for use as a substrate for both high and low pressure laminates. Its high quality finish and smooth surface makes it suitable for paint and overlay. T-PLY Precision Sand is commonly sold to remanufacturers who cut it into precise components and retail stores where it serves as an alternative to regular sanded grades.

- ✓ **All Canadian:** T-PLY products are 100% made in Canada with Canadian fibre.
- ✓ **Full Sand Face:** Available on both sides, the full sand face has a fine grit suitable for painting and laminating.
- ✓ **Solid Face:** This solid face has small voids filled with a solvent free latex-based putty.
- ✓ **High Strength to Weight Ratio:** This panel has a high strength to weight ratio so you can be confident with the panel without adding extra weight to the project.
- ✓ **Exterior waterproof glue:** The exterior waterproof glue gives users the flexibility to work in any weather conditions without sacrificing the quality of the panels.
- ✓ **Inner Plies:** An improved core veneer grade allowing for fewer and smaller defects to provide greater strength and improved fastener holding.

Available Panels

Thicknesses	Size
11.5 mm	1220 mm x 2440 mm (4' x 8')
14.5 mm	
17.5 mm	
19 mm	

- ✓ **Available Species:** CSP or DFP construction available.
- ✓ **APA Certified:** T-PLY products are structurally certified to CSA 0121 plywood standards.
- ✓ **Low Formaldehyde N.A.U.F.:** Less than 0.01 ppm using ASTM large chamber method.
- ✓ **Sustainability:** T-PLY products come from sustainably managed forests - PEFC Chain of Custody.
- ✓ **Eligible for LEED® and GreenGlobes™ credits:** Contact Tolko to find out how you may be eligible for credits.
