

TOLKO DIMENSION AND STUD LUMBER

TOLKO LUMBER

**TRUE.
TRUSTED.
TOLKO.**

TOLKO

SPF

Our SPF lumber is a combination of three Western Canadian softwood species: spruce, pine and fir. This unique species-mix offers high-grade lumber with small, tight knots resulting in extremely high fibre strength able to withstand the toughest inclement weather. Even with its superior strength, SPF lumber remains lightweight and very easy to work with.

DOUGLAS FIR/LARCH

Douglas fir/larch lumber boasts tight, straight grain, light brown in colour with a hint of red. Strong and easily adaptable, this lumber is one of the best building materials available on the market today. Valued for its dimensional stability and high specific gravity, this species variety offers superior fastener holding, along with a high strength to weight ratio. Douglas fir/larch has the highest Modulus of Elasticity (MOE) value of all North American tree species.

HEMLOCK/FIR

Hem-fir is a species combination of Western Hemlock and true firs. Possessing a lower density, hemlock/fir is easily pressure-treated with preservatives, and is available in structural, appearance and remanufacturing grades.

WESTERN RED CEDAR

Western Red Cedar is a soft, straight-grained species that is extremely resistant to decay and insect damage. It is preferred for exterior sidings, fences, decks and other outdoor applications.

SOUTHERN YELLOW PINE

Southern Yellow Pine Lumber is one of the most versatile species of lumber. Through Tolko's partnerships in the Southern USA we are pleased to offer Southern Yellow Pine dimensional lumber and specialty products to our customers.

STUD LUMBER

RIVERSIDE A-GRADE STUD

Riverside A-Grade Stud lumber delivers excellence in both quality and performance. It has restricted wane, shake, skip, splits, holes and warp. There is no white spec, honeycomb, or decay. For customers who are looking for superior visual appeal.

Applications

- High appearance and performance applications
- Residential and commercial framing
- Secondary manufacturing

RIVERSIDE #2 & BETTER

Riverside #2 & Better Stud lumber consistently provides higher recovery while meeting all grade and customer expectations. It is graded to an enhanced NLGA standard and is recognized by its blue end paint. Riverside #2 & Better is consistently on grade and provides excellent value for general construction.

Applications

- Areas requiring moderate design values
- Stud wall and framing
- General construction purposes

TOLKO STUD GRADE

Tolko Stud Grade lumber is your economical option for applications that require moderate values. Tolko Stud Grade is consistently graded to NLGA standards.

Applications

- Areas requiring moderate design values
- General wood frame construction
- Secondary manufacturing

DIMENSION LUMBER

TOLKO A-GRADE

Tolko A-Grade dimension lumber is your grade of choice when appearance is crucial. It has a superior visual appeal, pencil wane only, minimal warp, and no decay or rot.

Applications

- Interior/exterior applications such as fascia and decking
- High grade wood frame construction
- Secondary manufacturing such as panel stock and moulding
- Lumber treating

TOLKO SELECT STRUCTURAL

Tolko Select Structural dimension lumber provides high structural performance coupled with desirable appearance.

Applications

- Areas requiring high design values and denser material
- Engineered trusses and wall systems
- Housing construction

TOLKO MSR

Tolko MSR dimension lumber allows consumers to manufacture high quality components while controlling costs. It is machine stress rated to ensure structural performance. It is held to a #1 wane and warp control.

Applications

- Component manufacturing
- Engineered trusses and wall systems
- Areas requiring high design value

TOLKO PREMIUM GRADE

Tolko Premium Grade dimension lumber delivers all around structural performance with an emphasis on appearance. Our Premium Grade has a restricted wane and larger nailing surfaces.

Applications

- High grade wood frame construction
- Secondary manufacturing such as panel stock and moulding

TOLKO #2 & BETTER

Tolko #2 & Better dimension lumber continues to provide higher recovery while meeting all grade and customer expectations. Customers who are looking for consistent grades every time choose #2 & Better.

Applications

- Areas requiring moderate design values
- General wood frame construction
- Secondary manufacturing

TOLKO

Tolko is a family owned company based in British Columbia, with 60 years of experience manufacturing a wide range of forest products. We have become a trusted manufacturer and a valuable business partner for customers around the world. Our mills are focused on providing consistent quality and our sales team is dedicated to creating lasting relationships with our customers.

CUSTOMER COMMITMENT

We have become a trusted manufacturer and a valuable business partner for customers around the world. With nine lumber mills across Western Canada and Southern USA, the Lumber sales team optimizes production and sales to enhance efficiency and explore new product opportunities. Our mills are focused on providing consistent quality and our sales team is dedicated to creating lasting relationships with our customers.

BUILD GREEN WITH TOLKO

We manufacture our products from renewable, recyclable and biodegradable resources, and our practices are guided by our Forest Management Principles and Environmental Policy. We also adhere to globally-accepted Sustainable Forest Management (SFM) and Chain of Custody (CoC) standards.

Tolko products earn the certified wood credit under **LEED** and **Green Globes** through our Sustainable Forest Management (SFM) certification, Sustainable Forestry Initiative® (SFI) which fully qualifies under the LEED standard via the LEED Alternative Compliance Path process. In addition, our panel products qualify for incremental LEED credits under the low emitting materials requirements.

MAKING THE GRADE

Tolko optimization technology grades to our Tolko grade standards across all of our mills. Tolko grades per the National Lumber Grades Authority (NLGA) standards. In addition, Tolko produces proprietary premium visual structural grades for marketplace requirements.

 **WARNING**

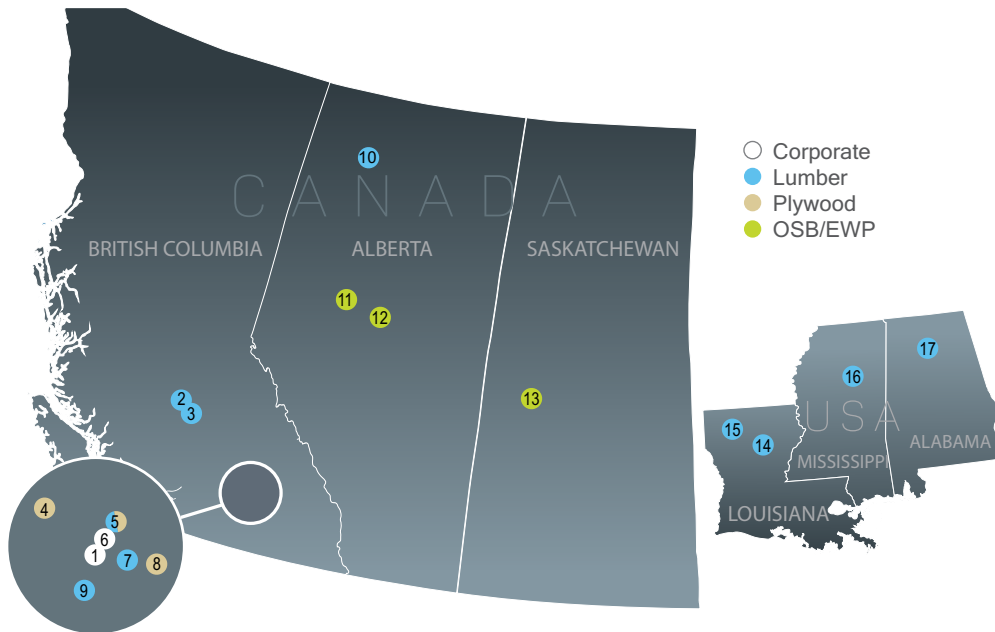

Drilling, sawing, sanding or machining wood products can expose you to wood dust, a substance known to the State of California to cause cancer. Avoid inhaling wood dust or use a dust mask or other safeguards for personal protection. For more information go to www.P65Warnings.ca.gov/wood.

 **WARNING**

This product can expose you to chemicals including methanol, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

TOLKO OPERATIONS

Tolko's state-of-the-art lumber, plywood, OSB, and EWP operations are located in the abundant forests of Western Canada and extend into the Southern Yellow Pine forests of the United States of America.
