

T-STRAND™ OSB | RV FASCIA

Engineered to perform. Designed to impress.

At Tolko, we've built our reputation on quality products, customer commitment and an unwavering integrity in all that we do. With our line of mill certified T-STRAND OSB Industrials, we provide a consistent source of OSB specifically designed for OEM applications.

We combined strength, moisture durability, and enhanced fastener holding to produce T-STRAND OSB RV Fascia, an OSB panel specifically designed for the intricacies and requirements of fascia applications.

T-STRAND OSB RV Fascia has superior moisture durability so RV manufacturers can be confident in the quality they provide to their customers who push their RV to the limits.

It's made with our Canadian Aspen wood fibre and bonded with the same resin used to manufacture our PS 2 certified OSB. This precise mixture of fibres and resin results in enhanced fastener holding for a durable panel that stands up to the rigorous demands of an RV.

- ✓ Superior moisture durability
- ✓ Engineered consistency
- ✓ Enhanced fastener holding

The Engineered Difference

Tolko T-STRAND OSB RV Fascia provides a proven solution for RV manufacturers. Our precise mixture and manufacturing process result in a consistent panel tailor made for RV fascia. Our products meet the demanding expectations of our customers and live up to the Tolko name.

T-STRAND OSB RV FASCIA

	
Product application	RV Fascia
Profile	Square Edge
Sanding	None
Thickness category	1"
Lengths¹	8', 12', 13', 14'
Widths¹	48.5", 5", 5-1/2"
Warranty	50 year limited warranty against delamination ²

¹ For promotional purposes, lengths and widths are nominal sizes; actual product dimensions comply with U.S. Weights and Measures requirements.

² See T-STRAND OSB Industrials warranty for complete details.

Recipe for Superior Performance

We start with Canadian Aspen wood fibre to produce superior OSB products that are lighter, more durable, and built to work.

The fibre is cut into strands and bonded with moisture resistant resins to optimize the collective strength and consistency of the panel.

T-STRAND OSB panels are pressed with intense pressure and temperatures to create a panel with low moisture content and a resistance to warping, swelling, and flaking.

NAUF Guaranteed

T-STRAND OSB products contain no added urea-formaldehyde resin (NAUF).

Committed to sustainable forest management

We manufacture our products from renewable, recyclable and biodegradable resources, and our practices are guided by our Forest Management Principles and Environmental Policy. We also adhere to globally-accepted Sustainable Forest Management (SFM) and Chain of Custody (CoC) standards.
