March 19, 2021

Mr. Armanini,

Please consider this letter confirmation that the Arclin[®] HP600 and Arclin[®] 5440 phenol/formaldehyde (PF) resins supplied to your Armstrong, BC and Heffley Creek, BC plywood plants does not contain any of the chemicals included in the European Chemicals Agency (ECHA) "Candidate List of Substances of Very High Concern" (SVHC). None of those chemicals are used as a constituent in our resin formulations. Furthermore, to the best of our knowledge, no quantifiable amounts of those chemicals are produced as by-products during the manufacture of our resins. Therefore, we believe that our resins are fully compliant with the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) regulation.

Please don't hesitate to write or call if we can provide further information or clarification.

Best regards,

A handwritten signature in blue ink that reads "Simon McAllister".
