One mission across North America

Tolko's state-of-the-art lumber, plywood, OSB and LSL operations are located in the abundant forests of Western Canada and extend into the Southern Yellow Pine forests of the United States of America.

Logistics excellence

Tolko has a flexible and reliable logistical network to provide high levels of service. We work closely with our mills, reload facilities, trucking companies and shipping carriers to ensure that our wood products are delivered on time throughout North America and beyond.

Solutions that work

We pride ourselves on being easy to do business with by searching for innovative solutions, identifying new opportunities, and investing in our customer relationships.

Green building standards

We work to balance environmental, social and economic performance through our policies, principles and actions.

Tolko products earn the certified wood credit under these standards through our Sustainable Forest Management (SFM) certifications (CSA and SFI) that fully qualify under the LEED standard via the LEED Alternative Compliance Path process. In addition, our panel products qualify for incremental LEED credits under the low emitting materials requirements.

True and trusted products and service

Tolko is a family-owned company differentiated by quality wood products, customer commitment and unwavering integrity. We are a strong company with a solid reputation and over 60 years of experience in the forest industry.

Around the world, we are recognized for being customer oriented and results focused. We pride ourselves on providing top customer service based on strong relationships and industry knowledge. We deliver on our promises and continually search for new opportunities to develop strong partnerships.

Tolko is based in Vernon, British Columbia and since its beginnings in 1956, Tolko has grown from a small sawmill to become a company with over 3,000 employees. We manufacture lumber, plywood, veneer, OSB, LSL, biomass power, co-products and a growing number of specialty wood products for world markets.
