

TOLKO LSL INDUSTRIAL 38

Just what you need. No more, no less.

Tolko LSL Industrial 38 is a value added solution for non-structural applications that performs consistently and reduces waste on the job. Using our proven T-TEC LSL technology, we've designed a durable industrial line that is defect free and won't twist, cup, or bow. Every inch of every board is usable.

APPLICATIONS

- Crating and packaging
- RV components
- Door and window components
- Shed components
- Office furniture and partitions
- Sport facility fixtures
- Wall and floor substrates

BENEFITS OF INDUSTRIAL LSL

Tolko LSL Industrial 38 is an excellent solution for non-structural applications that require consistent performance and dependable properties. It shares many of the same benefits as our APA rated, structural T-TEC LSL.

Tolko LSL Industrial 38 product benefits include:

- ✓ Uniformity. No natural defects, voids, or low density pockets
- ✓ Consistency in thickness, density, and moisture content
- ✓ Superior resistance to warping and twisting
- ✓ Excellent dimensional stability in panel flatness
- ✓ Water-resistant adhesives for durability
- ✓ Protection from the elements with bundle wrap
- ✓ Non-transferable, 1 year limited warranty

THE ENGINEERED DIFFERENCE

When we make LSL, we process the trees into strands and piece them back together to optimize the structural properties and provide a dependable product. Tolko LSL Industrials have been engineered and dried to a specific moisture content, so they do not inherit the natural twisting and warping of the original tree. Our LSL products are engineered to be straighter, more square and more consistent than sawn lumber.

TOLKO LSL INDUSTRIAL 38

| Specifications | |
|------------------------|--|
| Thickness ¹ | 1", 1-1/4", 1-1/2" |
| Depths ¹ | 3-1/2", 5-1/2", 7-1/4", 9-1/2", 11-1/4", 11-7/8", 14" 48-1/2" billets |
| Lengths ¹ | 16' |
| Average Density | 38 lb/ft ³ |
| Mill | Athabasca - Slave Lake, Alberta |

WARRANTY

Tolko LSL Industrials are backed by a limited, non-transferable warranty² against delamination.

HOW TOLKO LSL IS MADE

Tolko's LSL is made up of 7 inch long strands of fibre bonded together in a parallel formation with a waterproof adhesive free of urea-formaldehyde for superior dimensional stability.

In our state-of-the-art Athabasca mill in Alberta, moisture levels are closely monitored and controlled to produce a product with a moisture content similar to that of a residential home. These tight controls result in a product that is resistant to warping, twisting, shrinking and bowing after installation.

CONTINUOUS BENEFITS FROM A CONTINUOUS PRESS

To maintain consistency throughout each board, our LSL is pressed in our 234 foot long continuous press. The accuracy of this press allows us to continuously produce boards with a consistent thickness without sanding which means the surface strands are not damaged and we maintain the integrity of the adhesive. This results in a more durable, water resistant board that stands up to the elements on the job-site.

CONSISTENT QUALITY

Each run of LSL is inspected for strength properties, surface quality and dimensional precision to ensure every order is consistent and lives up to the Tolko name.

SUSTAINABLE FOREST MANAGEMENT

We manufacture our products from renewable, recyclable and biodegradable resources, and our practices are guided by our Forest Management Principles and Environmental Policy. We also adhere to globally-accepted Sustainable Forest Management (SFM) and Chain of Custody (CoC) standards.

1. For promotional purposes, lengths and widths are nominal sizes; actual product dimensions comply with U.S. Weights and Measures requirements
2. See unique product warranties for specific details on warranty inclusions and limitations, and always follow the storage and installation instructions. Warranty details available at www.tolko.com.
