WESTERN RED CEDAR PROFILE

Admired for its rich colour and timeless appeal, Western Red Cedar offers an elegance that endures through the seasons. Naturally enriched with oils and extractives, it has an inherent resistance to rot, decay, and insect damage, contributing to its long-lasting performance. A longtime favourite for outdoor spaces, it pairs long-lasting performance with natural beauty and distinctive character.

Installed: Warm reddish-brown tones with a fine, straight grain.

Weathered: Soft, silvery-gray patina.

EVERHEART PROFILE

Everheart is designed for outdoor spaces where increased wear calls for greater durability. Crafted exclusively from Douglas-fir heartwood, it delivers natural resistance to rot, decay, and insect damage, reducing surface wear without moving to treated products. With its rich colour and naturally tight grain, Everheart brings warmth and character to outdoor living spaces as a smart, cost-effective alternative to Western Red Cedar. Built to last, it maintains its timeless appearance year after year.

Installed: Light pinkish-brown tones with straight, tight grain.

Weathered: Rugged, natural gray tone.

SPF BOARDS PROFILE

Featuring unique colour tones and natural character, Tolko VISTA SPF Boards elevate living spaces with a timeless aesthetic. Each board is crafted for reliable performance, consistent sizing, and a superior finish. They deliver the clean, high-appearance VISTA quality required for soffits, interior finishing and remanufacturing.

Installed: Light, natural yellow-white tones with a straight, even grain and occasional small knots.
